

THE ENVIRONMENT

Overview of Pró-Mata Center for Environmental Research and Conservation, in São Francisco de Paula, in Rio Grande do Sul.

ENVIRONMENTAL SUSTAINABILITY

When setting the pillars of its strategic positioning, PUCRS has assumed the commitment to being a University that produces innovation as well as social, environmental, cultural and economic development for the benefit of society. This endorses the actions that have been promoted for years - as well as new initiatives - in the sense of preserving the environment and implementing institutional and educational projects aimed at respecting and ensuring the sustainable use of natural resources.

The materialization of the activities geared towards the environment can be attested as some of

them have been added to undergraduate curricula. The course on Socioenvironmental Studies, of the School of Humanities' Pedagogy Program, is one of such examples. The Environmental Management Committee and Project USE - Sustainable Energy Use are other examples.

Another example of that is the Pró-Mata Center for Environmental Research and Conservation, in the city of São Francisco de Paula (RS). Teaching, research and extension activities are offered in support of the Institute for the Environment.
